

Implement the following in C.

1. Calculator using Switch

Perform addition, subtraction, multiplication, and division of two numbers.

2. Factorial of a Number

Find the factorial of a number using a loop.

3. Palindrome String

Check if a string is a palindrome or not.

4. Largest Element in an Array

Find the largest number among n elements in an array.

5. Fibonacci Series

Print the Fibonacci series up to n terms.

6. Reverse a Number

Read an integer and print its reverse. Example: $123 \rightarrow 321$.

7. Sum of Digits

Input a number and calculate the sum of its digits. Example: $123 \rightarrow 6$.

8. Prime Number Check

Check whether a given number is prime or not.

9. Count Vowels and Consonants in a String

Input a string and count the number of vowels and consonants.

10. Simple Marks System

Input marks of 5 subjects, calculate **total, average, and percentage**, and assign a grade.
